Portfolio: [beyondimagination.co.technology](https://beyondimagination.co.technology) | GitHub: [github.com/BeyondImaginationTechnology](https://github.com/BeyondImaginationTechnology)

### PROFESSIONAL PROFILE

Founder and full-stack product builder at Beyond Imagination Corp. Technology with a decade of experience creating and deploying innovative web applications that integrate evolving technologies. Creator of BIT OS, a connected product ecosystem spanning identity management, media, education, and wellness. Experienced in mobile-first platforms, language-learning applications, creator tools, integration APIs, responsive interfaces, scalable solutions, and end-to-end product delivery.

### CORE TECHNICAL EXPERTISE

Linux / LAMP: Linux hosting, Apache, PHP, MySQL, cPanel, phpMyAdmin, deployment, debugging

Web Development: PHP, JavaScript, HTML5, CSS3, SQL/MySQL, JSON, responsive design, REST APIs

Native Mobile: Java, Swift, Android/iOS application development, mobile-first UX, API integration

Product Engineering: Authentication, dashboards, admin tools, dynamic forms, accessibility, QA, documentation

Integrations: Google authentication, Stripe, SMTP/email, AI media, text-to-speech APIs

Languages: English, French, Kreyòl (Haitian Creole), beginner Spanish

### PROFESSIONAL EXPERIENCE

#### Founder & Full-Stack Developer | Beyond Imagination Corp. Technology

Nanaimo, BC | 2019 - Present

- Designed and developed BIT OS, a connected web ecosystem with shared identity ([os.beyondimagination.co.technology](https://os.beyondimagination.co.technology)), user profiles, application access, and a unified rewards concept.
- Built responsive PHP, MySQL, and JavaScript applications featuring authentication, dashboards, admin tools, dynamic forms, content libraries, and multilingual experiences.
- Integrated payment, authentication, email, AI-generation, and text-to-speech services while resolving API, hosting, quota, and production issues.
- Led product strategy, UX design, Git workflows, testing, documentation, deployment, and live-site troubleshooting from concept through release.

### SELECTED PRODUCT PROJECTS

#### BIT OS & Beyond ID | Shared identity and application ecosystem

- Account registration, verification, profiles, cross-product access, and a foundation for connected products.

#### Beyond TV | Mobile-first streaming platform

- Scheduled programming, program guides, content rotation, playback fallbacks, and responsive interfaces.

#### Daily Breath & Beyond French | Faith and language-learning applications

- Reusable content templates, multilingual narration, lesson libraries, and publishing tools.

#### Beyond Tattoo | Creator platform

- Automated stencil generation, premium collections, download tracking, administrative workflows, and print-ready assets.

#### Beyond Catering | Commerce platform

- Vendor onboarding, menus, orders, billing, media management, and customer-facing storefronts.
