

GRÉGOIRE J. ROSIER

FOUNDER & FULL-STACK LINUX (LAMP) | NATIVE JAVA / SWIFT MOBILE DEVELOPER

Nanaimo, BC | (250) 667-5487 | rosiergreg@gmail.com

Portfolio: beyondimagination.co.technology | GitHub: github.com/BeyondImaginationTechnology

Full-stack product builder targeting junior web, front-end, software engineering, and Linux-focused development roles.

HIGHLIGHTS OF QUALIFICATIONS

Founder and hands-on developer with a decade of experience building, deploying, and supporting web products from concept through release.

Full-stack experience with Linux hosting, Apache, PHP, MySQL, JavaScript, HTML5, CSS3, JSON, REST APIs, responsive interfaces, and Git-based workflows.

Built BIT OS, a connected product ecosystem with identity management, user profiles, application access, media, education, wellness, and commerce capabilities.

Native mobile development foundation in Java and Swift, supported by a Graduate Diploma in Mobile App Design and Development.

Experienced integrating authentication, payments, email, AI-generation, text-to-speech, and other third-party APIs; comfortable debugging production, hosting, quota, and deployment issues.

Strong product mindset with practical experience in UX design, admin tools, dashboards, QA, technical documentation, multilingual content, and live-site troubleshooting.

EMPLOYMENT EXPERIENCE

Founder & Full-Stack Developer 2019 - Present

Beyond Imagination Corp. Technology

Nanaimo, BC

Designed and developed BIT OS, a connected web ecosystem with shared identity (os.beyondimagination.co.technology), user profiles, application access, and a unified rewards concept.

Built responsive PHP, MySQL, and JavaScript applications featuring authentication, dashboards, admin tools, dynamic forms, content libraries, and multilingual experiences.

Integrated payment, authentication, email, AI-generation, and text-to-speech services while resolving API, hosting, quota, and production issues.

Led product strategy, UX design, Git workflows, testing, documentation, deployment, and live-site troubleshooting from concept through release.

SELECTED TECHNICAL PROJECTS

BIT OS & Beyond ID

Shared identity and application ecosystem

Account registration, verification, profiles, and cross-product application access. Designed the foundation for connected products and a unified rewards concept.

Beyond TV

Mobile-first streaming platform

Scheduled programming, program guides, content rotation, playback fallbacks, and responsive interfaces.

Daily Breath & Beyond French

Faith and language-learning applications

Reusable content templates, multilingual narration, lesson libraries, and publishing tools.

Beyond Tattoo

Creator platform

Automated stencil generation, premium collections, download tracking, administrative workflows, and print-ready assets.
